

Sports Net & Divider Curtain

Manual Divider Curtain “Walk Draw” Mixed Net & Canvas PVC

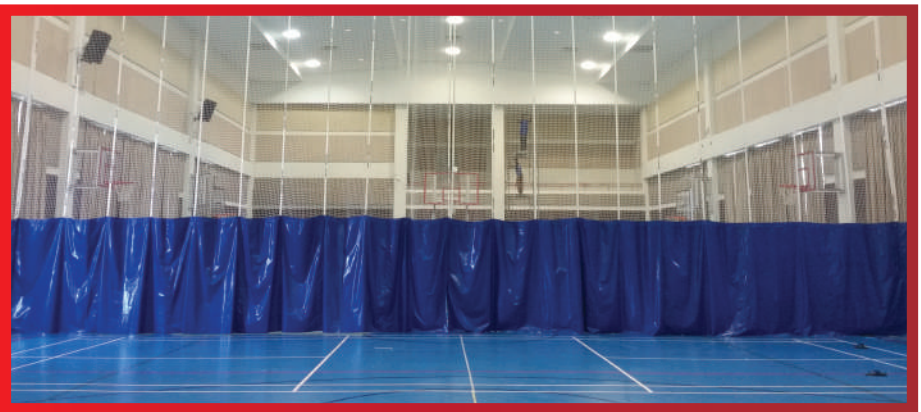

AFN Sports divider curtain is designed and manufactured to divide the indoor sports facility into more than one court in order to hold multiple sport activities at the same time without interference. As it is a product of great use in facilities, it has been designed to work in a very simple manner without the need for complex maintenance.

The manual curtain is manufactured to be hung and rolled through a rail. The guide rail is made from special aluminium profile; the roller (every 30 cm) is made from nylon and specially designed for long lifetime.

Net made from high tenacity polypropylene 3 mm, mesh 45 mm, knotless.

Canvas made from PVC 650 gr/sqm.

Fireproof and available in different colours.

*Subject to technical alterations

Electrical Divider Curtain

System composed of aluminium guide rails support to be fixed to the roof structure, stop net protect walls and retard rebound of balls. With intermediate support belt system in every 1.2m, that will support the lower counterweight whilst simultaneously transferring the rotary movement of the shaft, with high tenacity polypropylene net, thickness 3mm, mesh 45mm.

An electric motor positioned in the center, the motor axle equipped with take up reels for the belts. Curtain is in solid (canvas) and mesh (PP netting) configurations. A lower counterweight which provides the canvas with the appropriate tautness or rigidity when rolled. An anchoring system that is designed and measured specifically for each facility.

2-meter-high below canvas. (available in different colours)
